Who am I ?

As an electronics and telecommunications engineer, I have been involved in the specialized electronics industry for information security for over 15 years, including wiretap detection (including in phones), hidden cameras and GPS trackers, and anti-surveillance protection.

I also offer consulting, design, and analysis of electronic devices used in surveillance/countersurveillance, including PCB design and reverse engineering.

I hold the appropriate licenses, certificates, and documented references confirming my technical competence. I am a licensed detective entered in the register of detectives of the Ministry of Interior and Administration, RD-8/2026.

I use professional equipment and proven methods in my work.

I complete each assignment with complete discretion, reliability, and a personalized approach. I invite you to learn more about my full range of services.

Offer

- detection of wiretaps, hidden cameras, voice recorders, and other spying devices in offices, apartments, or other properties

price: from PLN 1,000 for offices up to 20m²

- detection of GPS and other spying devices in vehicles

price: from PLN 1,000 for passenger vehicles

- detection of wiretaps on phones, smartphones, tablets, laptops, and PCs, including spyware, viruses, and data-stealing applications
- device protection with appropriate software.
- backups and other cybersecurity services.
- replacement phone for the duration of the service.

price: from PLN 1,000.

- audio recording transcriptions
- transcripts of conversations, meetings, and court materials
- evidence processing provided by the client
- preparation of materials for law firms and proceedings
- quality improvement and noise reduction of audio recordings

price: PLN 150/hour

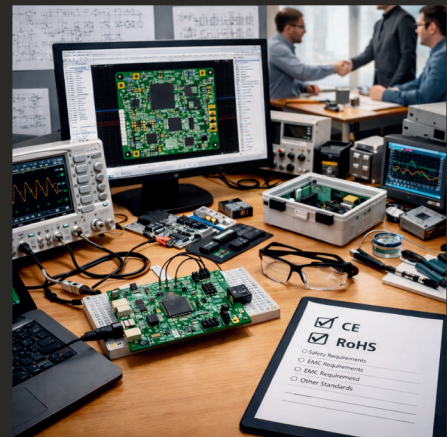

Offer

- analysis of individuals and businesses
- open-source intelligence (OSINT) – obtaining information from open sources – verification of BIG, KRD, and social media and dating sites such as Facebook, Instagram, etc.
- analysis of personal, business, and community connections
- analysis of reputation, image, and online activity
- OSINT and information reports

price: PLN 150/hour

- designing electronic device schematics
- PCB design
- microcontroller programming
- analysis and simulation, research and testing on demand
- analysis of standards that a device must meet before being introduced to the market
- intermediation - assistance in verifying/selecting a subcontractor for project implementation or production
- reverse engineering
- "recreating" a functional device that works like the original

- Information security and protection consultations – thorough problem analysis and solution presentation (use caution when reading online materials – false information about security, wiretapping, surveillance, etc. is often available)

price: PLN 200/hour (consultation in Torun)
PLN 150/hour (online consultation)

Why choose me?

I have over 15 years of experience in:

- implementing projects for specialized electronic devices
- detecting wiretaps and other information-stealing devices, leveraging my expertise in spectral signal analysis, designing intrusion/intrusion alarm systems, access control, video and audio systems, and many others (wipers are often installed in these devices, a detective without engineering experience will be unable to identify these types of threats)
- detecting GPS and other tracking devices installed in vehicles (we have our own vehicle diagnostic station, which is essential for conducting a comprehensive inspection)
- securing offices/vehicles against wiretapping and unauthorized call recording (I have jamming devices designed and manufactured by myself, ensuring their effectiveness and reliability)
- analysis and processing of audio recordings that were recorded in difficult conditions, are heavily noisy, or are almost inaudible (I can improve their quality to the point that the conversation is understandable)

Professional execution of orders is confirmed by references, reviews on Google and LinkedIn, and certifications:

- detective license for 10 years, entry in the Detective Register of the Ministry of Interior and Administration (MSWiA) RD-8/2026
- technical Security Officer License for over 20 years, issued by the Bydgoszcz Provincial Police Headquarters
- technical Security Officer Certificate PZT-14024, issued by the Bydgoszcz Provincial Police Headquarters
- IT Cyber Security CISS Certificate

I operate throughout the country and the EU
